POSITIONING

Design × Product × AI × Engineering

One person carries the work across four disciplines that usually hand off to each other. The research, the data model, the interface and the pitch come from the same hands.

EDUCATION	M.S. and B.S. in UX Design, Full Sail University. Graphic Design Certificate, CalArts.
STUDIO	Founder, Archer Design, 2021 to present. Hospitality creative, product and investor work.
AGENCY	Graphic Designer and client-facing operator, SHAIPE Agency, 2021–2025.
PRODUCT	Co-founder, JobGhost: growth systems and product positioning, 2025–2026.

> Use AI for ambiguity. Use deterministic systems for guarantees. Keep a human where brand judgment matters.
>
> WORKING PRINCIPLE

PROVEN CREATIVE SCALE

Hospitality social, produced at volume and measured.

Approximate lifetime totals across hospitality social programs for hotel, restaurant and spa brands. Selected clients include Hampton by Hilton, Hotel Indigo Pittsburgh, Eliza Hot Metal Bistro and Elements Salon & Wellness.

SOCIAL POSTS

≈2,970

IMPRESSIONS

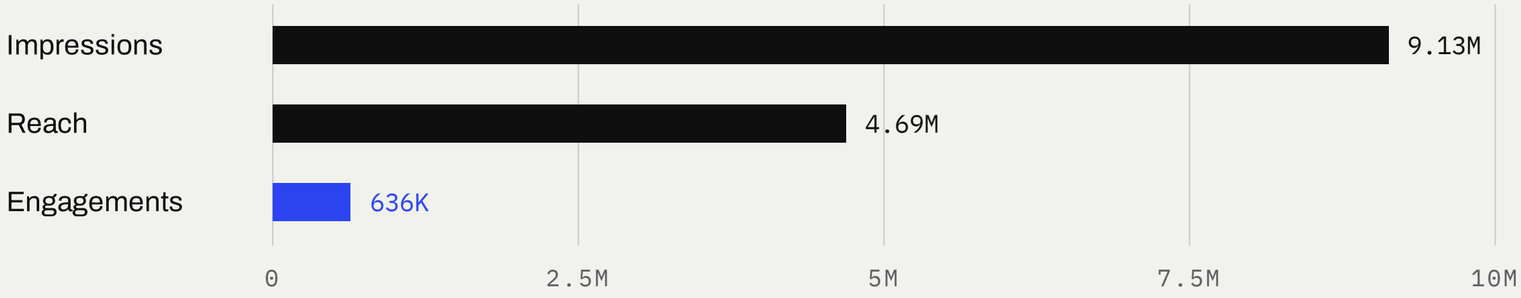

≈9.13M

REACH

≈4.69M

ENGAGEMENTS

≈636K

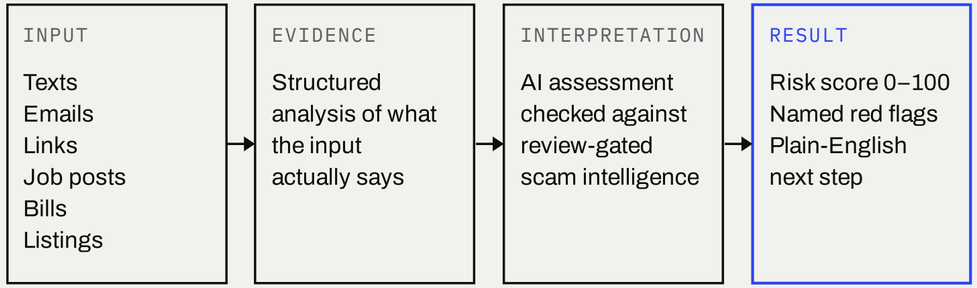

Engagement rate on impressions	7.0%
Engagement rate on reach	13.6%
Impressions per post	≈3,070
Engagements per post	≈214
Frequency (impressions ÷ reach)	1.95

PRODUCT SYSTEMS

Products that turn uncertain inputs into decisions a person can act on.

CheckRay

AI-ASSISTED SCAM ANALYSIS · CHECKRAY.APP

EXAMPLE RESULT SHOWN ON THE PRODUCT PAGE

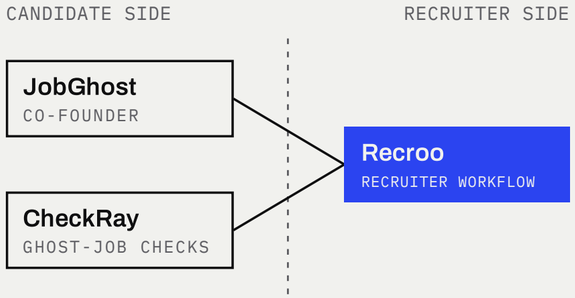

91/100

- Equipment purchase request
- Rushed hiring language

Evidence stays separate from interpretation, and the product says what it is: “Ray is a second opinion, not a guarantee.”

Recroo

RECRUITER WORKFLOW SAAS

ONE HIRING MARKET, BOTH SIDES

The recruiter-side product in a body of work on hiring. JobGhost and CheckRay’s ghost-job checks protect candidates; Recroo organizes the recruiter’s daily workflow.

Investor & diligence

READINESS AND EVALUATION SYSTEMS

1. Public-material audit
2. Source-of-truth register
3. Investor narrative map
4. Capital-story cleanup
5. Deck architecture
6. Proof-room and data-room checklist

Evaluator Workbench. Decision support for grant review: proposal queue, evidence, support and confidence, allocation under a fixed budget. Independent concept with fictional data.

NO INVENTED FINANCIALS. EVERY FIGURE TRACES TO A SOURCE.

TECHNICAL CAPABILITY

One production stack, used end to end.

Designs leave Figma as working software: typed interfaces, a real database, deployed previews and tests that run.

INTERFACE	Next.js, React, TypeScript, Tailwind
DATA	Supabase, Postgres, auth, Zod schemas
DELIVERY	GitHub to Vercel, CI, Vitest, Playwright
AUTOMATION	Webhooks, cron routes, GitHub Actions, Resend sequencing
AI	Model APIs, bring-your-own-key, MCP server, human approval gates
CRAFT	Figma as source of truth, Storybook, token pipeline

BUILD	NEXT.JS	SUPABASE	VERCEL	PRODUCT UX	WORKFLOW AUTOMATION	AI-ASSISTED DEVELOPMENT	AUTOMATED TESTS
VibeCode+ GITHUB-NATIVE AI CODE REPAIR	■	■	■	■	■	■	■
Momentum Systems Lab INDEPENDENT CONCEPT · FICTIONAL DATA	■	■	■	■	■	■	■
Inference Launch Lab INDEPENDENT CONCEPT	■		■	■		■	■
Evaluator Workbench INDEPENDENT CONCEPT · FICTIONAL DATA	■	■		■	■		
Hotel Pipeline OS STUDIO CRM AND OUTBOUND	■	■		■	■		

FILLED MARKS ARE CONFIRMED IN THE BUILD RECORD. EMPTY CELLS MAKE NO CLAIM.

216 / 216

Automated tests passing on VibeCode+, which opens draft pull requests only. A human merges.

AI accelerated implementation. It did not own product judgment.

FROM COMPLEXITY TO CLARITY

Many inputs in. One decision out.

Every engagement runs through the same five stages, whatever the subject. Three real builds traced through them below.

01 Research / data

Collect what is true: sources, numbers, constraints.

02 System

Model it once as a schema, a register or a rule set.

03 Interface

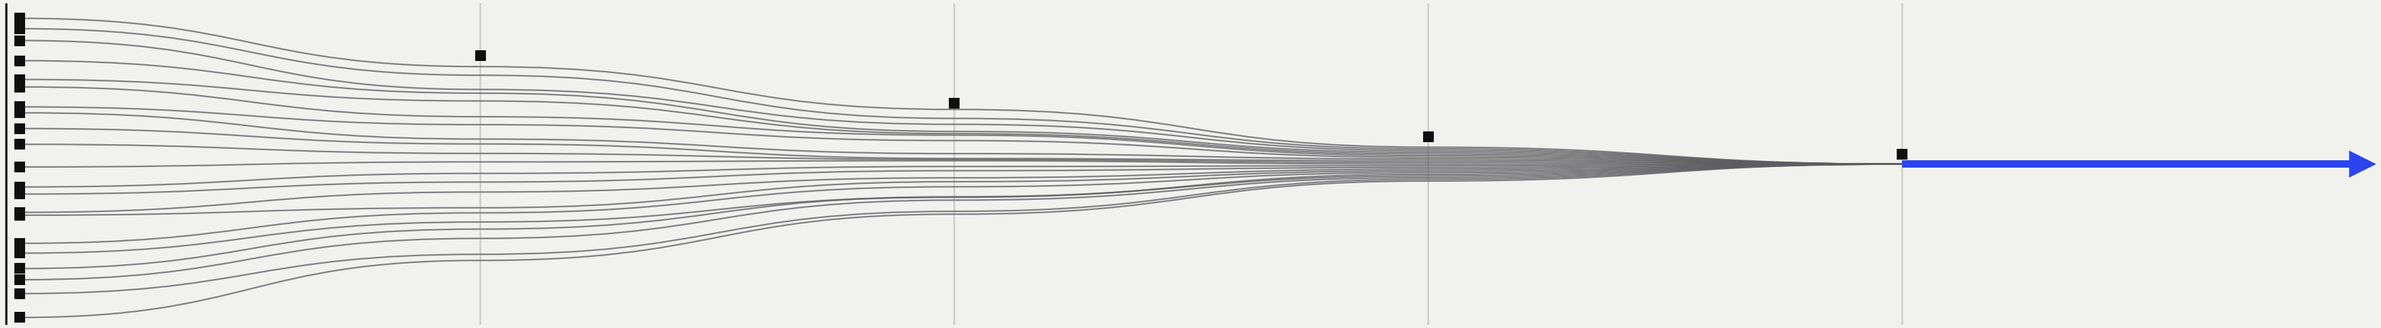

Make the system legible on a screen people can use.

04 Story

Sequence it for the person who has to decide.

05 Action

Hand over a decision that can be made today.

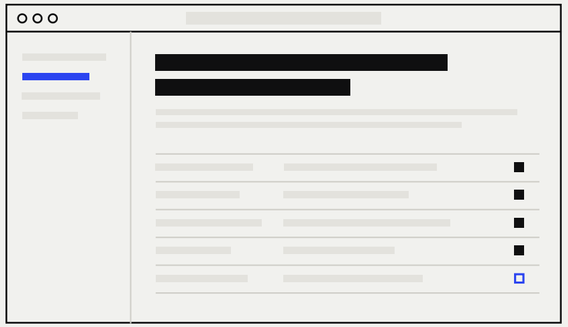

INVESTOR READINESS				
Public-material audit	Source-of-truth register	Private investor room	Narrative map and deck architecture	Investor conversation backed by a proof room
CHECKRAY				
A suspicious text, link, job post or bill	Structured red-flag evidence	Risk score with named flags	Plain-English explanation	Verify through official sources before acting
EVALUATOR WORKBENCH				
Proposal queue and evidence	Support and confidence record	Decision panel and compare mode	Allocation rationale under a fixed budget	Funding recommendation

SELECTED OUTPUTS

Six formats, one method.

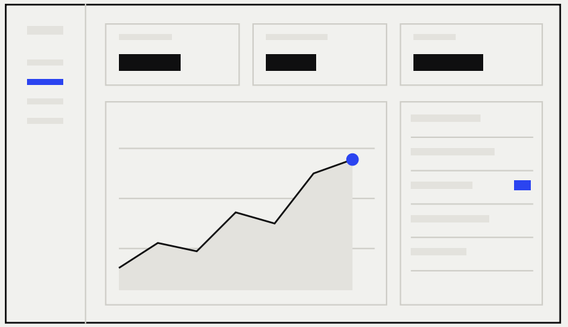

Each output is the last visible layer of a system underneath it: a register, a schema, a production pipeline.

Investor rooms

WEB

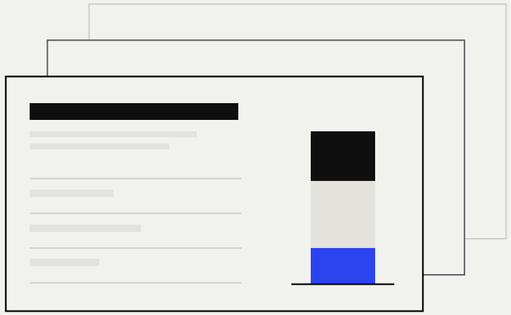

Private narrative pages built from public-source facts, with a source register and a proof-room checklist.

Dashboards

PRODUCT

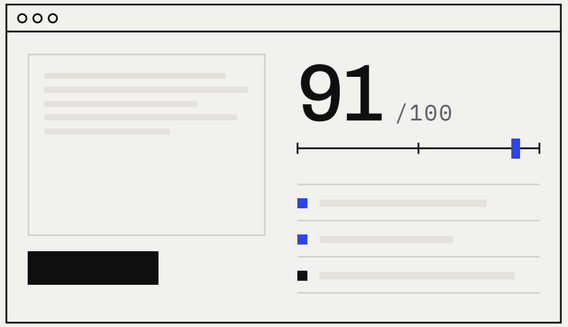

Decision-support consoles: a seven-screen repair console for VibeCode+ and an evaluator queue with confidence records.

Pitch decks

INVESTOR

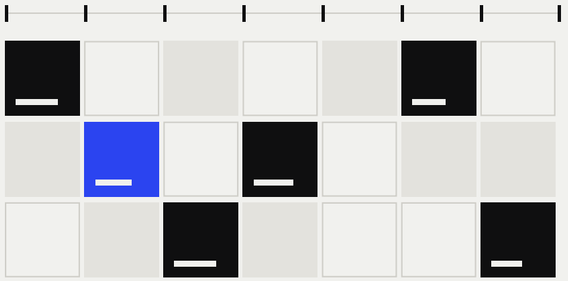

Investor decks for hospitality developments: phasing, capital stack and sponsor equity, with every assumption labeled.

Product interfaces

SAAS

CheckRay risk results, Recroo recruiter workflows and the Inference Lab's five-stage request view.

Campaign systems

SOCIAL

Auto Creative OS: a production system for hotel, F&B and spa campaigns, behind roughly 2,970 published posts.

Motion & video

SHORT-FORM

Short-form motion and AI-assisted video for hospitality social, F&B and event creative.

SCHEMATICS SHOWN. CLIENT WORK IS SUMMARIZED, NOT REPRODUCED.

I design the system and the story around it.
